

The flanging process allows you to have a round edges, removing the excess burr and maintaining the width and thickness tolerances unaltered. We can obtain strips, oscillated strips and flanging strips.

THICKNESSES

from 1.20 to 6.00 mm

WIDTHS

from 10 to 60 mm

PRODUCTS

Internal diameter: 400 to 500 mm

Max External Diameter: 1,200 mm

Maximum Weight: 2,000 kg

Packing to be specified at the time of the order.

NOTES

Products can be wound as oscillated strips with widths between 200 and 400 mm: an important detail that allows your machines to obtain a higher performance due to a reduction of setup times.
